POURING IN.

[BY TELEGRAPH TO THE TRIBUNE.] Washington, Oct. 7 .- Try as they may, and do, to put on a bold front and, look cheerful over the even to a casual observer, that the officers of the Democratic Congressional Committee are in a condition of anxiety and fear closely bordering on demoralization, and that nearly every Democaller at their headquarters contributes somthing to aggravate that condition. The few exceptions are "rainbow chasers" of the most enthusiastic description, whom Chairman Fault-ner welcomes as men after his own heart. Such participant in the action taken by the United States a man is Mr. Seymour, the Commissioner of Patents, who returned to Washington after a siege, had access to official reports. He describes fore the recent elections in that State, filled with confidence and enthuriasm and loaded to the muzzle with predictions of glarious Democratic victories. The gleam of Joy that he brought entirement the Democratic headquarters for a few hours, only to plunge its occupants into Still deeper gloom when the returns were flashed over the wives. About the same time came Helds manufacturers. The United States Navy continues visit to his home in Connecticut several days belivened the Democratic headquarters for a few hours, only to plunge its occupants into still deeper gloom when the returns were flashed over the wires. About the same time came Hoke Smith from Georgia, with the candidate for Governor—an estimate that the returns have reduced over 50 per cent. According to "The Atlanta Constitution" this result, was mainly due to the citorts of Hoke Smith. Henry G. Turner and other "goldbug bush-whackers" in the Democratic party. The Democratic managers have been so dazed by the result, however, that they have not sought to larparty has suffered in that Gibraltar of Southern Democracy. In fact, they have had no time to do so, for close upon its heels have come most disquieting and discouraging reports from other Southern States, of Democratic aparly and discouraging reports from charter states of Democratic stronghold is threatening, if not critical, and several Congress that the area in great danger. There was no Republican candidate in the field then, as there is this year, and the Populist candidate received 12.284 votes. The Populists are making an unusually active and aggressive campaign, and, it is reported, are receiving large accessions from the Democratic ranks. This district elected as Greenbacker to Congress a few years ago by a majority of nearly 1.500 votes. The displacement of Governor Sayers by a Populist would be regretted by most of the Republicans who have served with him in Congress, and would be a serious loss to his party. In the XIIIth District Judge Paschal was defeated for renomination and account of his vote in favor of free wool, and the prospect, according to information from Democratic sources, is that his successory of the Democratic party there. make up a deficit which remains. Offerings and legacies were also asked for the endowment fund. This fund is urgently needed for effective work, and to enable the parish to hold its ground amid the changes that are taking place in the neighborhood. Dr. Kran said that if St. Ann's ever moved it would be for the sole reason that it could not, with its double mission, resist the pressure to which its etuation and other circumstances make it subject. For forty-two years, without pew rents, or a wealthy congregation, and with a burden of debt, it has done a creditable work for hearing and speaking people and for an afflicted class: but in the changed conditions which time has brought an endowment is indispensable if the church is to continue where at its.

AN ENGLISH FINANCIER ARRESTED.

Perhaps the most popular of the interesting articles, comprising a volume of 450 pages, relates to the revolt in Brazil, and is written by Lieutenant C. C. Rogers, who, in addition to being a participant in the action taken by the United States vessels in Rio Harbor, and a witness of the entire siege, had access to official reports. He describes minutely the forces of the belligerents, and the engagements in the latter part of 1895, which were of especial interest to navial officers.

It appears from the reports of the specialists attached to the Intelligence Office that the superiority of the American Harveyizing process of hardening armor has been universally recognized, and that it has been adopted by all the leading nations and manufacturers. The United States Navy continues to occupy the most advanced position as regards awall arm calibres and ordinance generally. Leading authorities agree that the naval artillery of the future will be of moderate dimensions.

Washington, Oct. I.—The Department of State has received advices dated September 12 from Consulgeneral James H. Mulligan, who recently arrived at his post at Apia, Samoa, announcing the death of High Chief Mamea, of Lefagu, on September 3, in Apia, where he had lived during the recent troubles. The village of Lefagu, of which he was the hereditary chief, has been almost from the commencement of the war in rebellion against the established government of King Malieton. The conspicuous loyalty of Mamea to the government of Malieton, whose intimate personal friend and associate he was, made him an object of hostility to his neighbors and he was consequently compelled to live at Apia for fafery. His prominence as the companion of the King in the disturbed state of affairs still continuing to some extent in his native district made it unsafe for him to return home on the conclusion of peace.

Mamea played a conspicuous part in the history of Samoa. He was the Samoan Minister to Wasnington in 1818, when he concluded with Secretary Evarts the treaty of fitchesulp and commerce her tween the United States to Tago-Fago harbor work secured and guaranteed. He was a specially the uline interest he felt in their institutions, the progress and their greatness.
